INTRODUCTION

The nomenclature of countries and territories for the international trade in goods statistics of the Community - known as the "geonomenclature", abbreviated to GEONOM - is an essential element in compiling these statistics. In particular, it makes it possible to identify those involved in trade, i.e. the reporting country and the partner country.

The creation, maintenance and use of this nomenclature are laid down by Article 9 of Council Regulation (EC) No 1172/95 of 22.5.1995 (OJ L 118 of 25.5.1995) on the statistics relating to the trading of goods by the Community and its Member States with non-member countries. As for the statistics on intra-Community trade, Article 7 of Regulation (EC) No 1982/2004 of 18.11.2004 also refers to this nomenclature.

When necessary the geonomenclature is subject to revision in order to incorporate the adjustments needed for statistical purposes and to take into account any geopolitical change that may have occurred. Commission Regulation (EC) No 1833/2006 of 13.12.2006, which lays down the geonomenclature **applicable as from 1.1.2007**, was published in OJ L 354 of 14.12.2006.

The Regulation requires those responsible for supplying statistical information to stop using numerical codes, but to help Comext users they are still included in this publication.

The purpose of this publication is to provide users with all the supplementary information on the GEONOM 2010 that is essential to understand its content and to illustrate the changes in country codes in order to facilitate analysis of the results of the statistics on the European Union’s international trade in goods.

With a view to improving the next edition and providing a better response to users’ needs, any corrections or comments are welcome.
